

Fepod SaaS solution

Offer superior testing experience with your own branding

Benefits of Fepod Software as a Service solution

- **Enhanced Customer Satisfaction:** Intuitive usability – tailor to your unique user flow effortlessly.
- **Swift Speed-to-Market:** Expedite your deployment for a competitive edge.
- **Cost-Effectiveness:** Enjoy the advantages of a configurable platform without the expense of bespoke development.
- **Cutting-Edge Technology:** Stay ahead with our modern tech stack and ongoing development roadmap.
- **Comprehensive Expertise:** Beyond software, we offer expertise in electrochemical sensors and PalmSens reader hardware.
- **Regulatory Compliance:** Operate confidently in highly regulated markets, ensuring top-tier data security and compliance (ISO 13485, ISO 14971 in progress).

Key Features

– Tailored to Your Needs

1. Seamless Connectivity

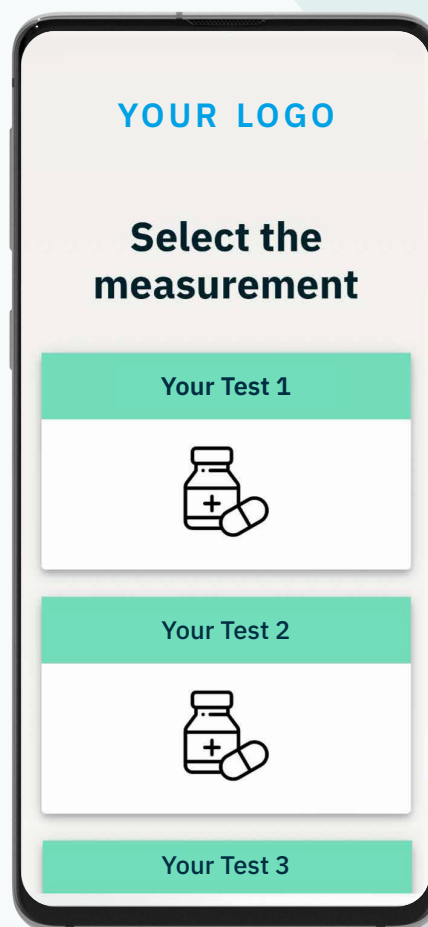

- **Two-Directional Interface:** Retrieve raw data effortlessly with PalmSens measuring devices, full MethodSCRIPT support. Supports Bluetooth and USB -connection.
- **Authentication Flexibility:** Integrate with various providers such as Azure AD/ Microsoft Entra.

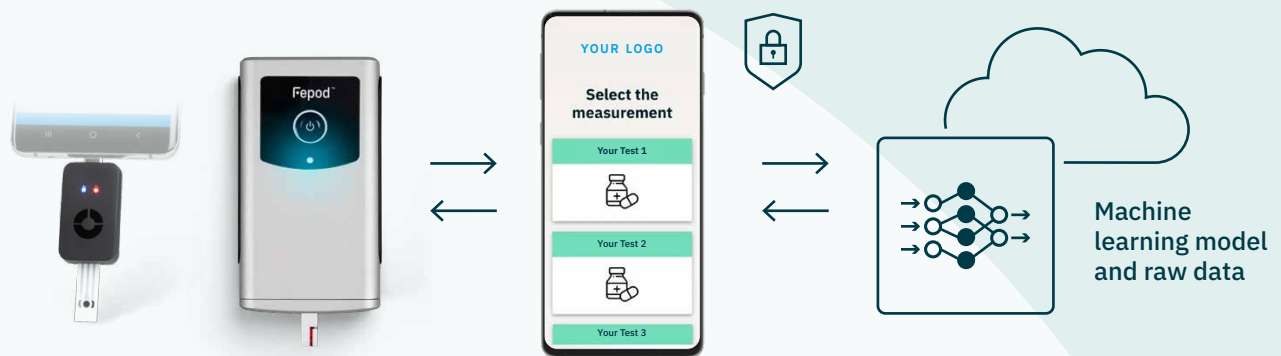

2. User-Centric Configurations

- **Configurable User Flow:** Tailor measurement user experiences to meet your unique requirements, your logo shown when logged into the service.
- **Cross-Platform Compatibility:** Access user-friendly interfaces on web, Android, and Apple iOS.

3. Secure Data Handling

- **Central Cloud Storage:** Ensure data security with secure storage on Microsoft Azure.
- **Accessible Data:** Retrieve and process data easily through a standard API for secondary use.

Examples of selections

- **Standard package:** after downloading Fepod app you want your custom logo after login, different color, support for three tests and you have your own algorithm for PalmSens raw data implementation.
- **Premium features:** you want that app is found by your name in the app stores, you want machine learning model to be developed for at least some of your tests, you want an additional user interface or a special user / admin mode.

Fepod SaaS Premium

Possible add-on features with separate pricing, choose the features as add on that are beneficial to you or upgrade later

- ✓ Downloadable applications with your own brand (logo and color) – full white label
- ✓ Your designated machine learning model for chosen tests
- ✓ Dedicated instance and own private cloud environment
- ✓ Multi-site support (in case you have many different end customers)

Seamless Onboarding

– Get Started Today

1. **Introductory Call:** get immediate test credentials to test the demo version for 1 month for free.
2. **Personalized Quote:** Get a personal quote, tailored to your unique needs.
3. **Deployment Project:** Choose basic features and get started quickly or include premium features for 1-5 months of deployment depending on the scope.
4. **Offer Your Service:** Start serving your customers in just one month!

Pricing

- Implementation project setup fee: estimated based on how many tests you want to implement and other adjustments needed.
- Base Fee: Flexible monthly or annual options.
- Usage-Based Variable Fee: Pay as you grow.

Additional support services

– charged on time & material basis

- MethodSCRIPT assistance, raw data interpretation algorithm implementation, machine learning model creation for a test.
- Configuration of the platform (eg. changing logo / colors, adding a new test and algorithm, changing the end user flow / experience).
